

Title

Correction: Brief Sleep Restriction Therapy and sleep efficiency in insomnia in older adults: a clinical epidemiology analysis

Abstract

This notice corrects a nonclinical metadata error in an earlier report on brief sleep restriction therapy for insomnia in older adults. The participant population, intervention, comparator, analyses, and clinical conclusions are unchanged. The corrected record clarifies the outcome definition and preserves the original study context for evidence review. Results were broadly stable after adjustment for age, baseline severity, and prior treatment. This report is from a parallel-group randomized controlled trial comparing Control: wait-list care vs Intervention: strength and balance exercise + inhaled anti-inflammatory therapy.
