

Title

Correction: Home Pulmonary Rehabilitation and exercise tolerance in chronic obstructive pulmonary disease: findings from routine clinical practice

Abstract

This notice corrects a nonclinical metadata error in an earlier report on home pulmonary rehabilitation for chronic obstructive pulmonary disease. The participant population, intervention, comparator, analyses, and clinical conclusions are unchanged. The corrected record clarifies the outcome definition and preserves the original study context for evidence review. A prespecified sensitivity analysis produced estimates in the same general direction. This report is from a parallel-group randomized controlled trial comparing Control: usual care vs Intervention: CBT + educational material.
