

Title

Correction: A Graded Activity Programme and pain-related function in chronic low back pain: an assessment of variation in response

Abstract

This notice corrects a nonclinical metadata error in an earlier report on a graded activity programme for chronic low back pain. The participant population, intervention, comparator, analyses, and clinical conclusions are unchanged. The corrected record clarifies the outcome definition and preserves the original study context for evidence review. A prespecified sensitivity analysis produced estimates in the same general direction. This report is from a parallel-group randomized controlled trial comparing Control: wait-list care vs Intervention: strength and balance exercise + inhaled anti-inflammatory therapy.
