

Title

Correction: Pacing And Energy Conservation Coaching and physical function in post-viral fatigue syndrome: a service-user experience report

Abstract

This notice corrects a nonclinical metadata error in an earlier report on pacing and energy conservation coaching for post-viral fatigue syndrome. The participant population, intervention, comparator, analyses, and clinical conclusions are unchanged. The corrected record clarifies the outcome definition and preserves the original study context for evidence review. The investigators reported uncertainty intervals rather than relying on a single summary estimate. This report is from a parallel-group randomized controlled trial comparing Control: wait-list care vs Intervention: strength and balance exercise + inhaled anti-inflammatory therapy.
