

Title

Corrigendum: Soft Robotic Exoskeleton Training Enhances Gait Parameters in Parkinson Disease

Abstract

In the article published in this issue, Figure 2 (Gait Kinematics During Four-Week Intervention) was incorrectly duplicated from Figure 1. The correct Figure 2, showing postintervention gait patterns, has been provided to the journal. This correction does not affect the reported numerical results, statistical findings, or the study's conclusions regarding robotic exoskeleton efficacy.
