

Title

Corrigendum: Fractional Laser-Primed Photothermal Nanoparticle Therapy Versus Ultrasonic Delivery for Acne Treatment

Abstract

In the published manuscript, Table 2 incorrectly labelled the histological assessment categories, with the "follicular sebum quantification" column header inadvertently transposed with the "dermal collagen assessment" column. The authors' original histological findings and statistical conclusions remain unchanged, as the data values were entered correctly despite the column header error. This correction does not affect interpretation of therapeutic outcomes or study conclusions.
