

Title

Corrigendum: Digital adherence technology with metabolite-based verification improves TB treatment completion

Abstract

In the primary results article of this trial, Table 2 contained a mislabeled column header. The percentages reported under 'Baseline Adherence' were inadvertently duplicated in the row for 'Week 12 Metabolite Detection' due to a data import error. The corrected table reflects accurate metabolite detection rates at all timepoints and does not affect the primary efficacy conclusions. The study conclusions remain unchanged. We regret any confusion this may have caused.
